

The 2007 (74th) Pulp and Paper Research Conference

Sponsored by JAPAN TAPPI
Organized by Wood Science Committee

Date: June 12-13, 2007

Venue: Tower Hall Funabori, 4-1-1 Funabori Edogawa-ku, Tokyo, Japan

Program:

Oral and poster presentations will cover the following topics:

- Forest tree breeding and biotechnology
- Biomass and wood chemistry
- Pulping, deinking and environment
- Wet-end chemistry, papermaking and chemicals
- Coating and paper converting
- Analysis and properties of pulp and paper
- Facilities, measurement and process control
- Others

Dead line for registration

May 30, 2007

CONTENTS

ORAL PRESENTATIONS

- 01-A Efficient application of bulking promoters for various papermaking conditions**
Masayuki Watanabe, Koji Okomori and Takashi Ochi
- 02-A Mechanism of paper strength development by the addition of dry strength resin
– Effect of Application Method –**
Ichiro Mihara and Tatsuo Yamauchi
- 03-A The effect of bulking promoter additions at the wet end on paper properties and their mechanisms**
Kenta Mukai, Toshiharu Enomae and Akira Isogai
- 04-A On the factors concerning wet-strength development of paper prepared with konjac glucomannan (KGM)**
Takao Obokata and Akira Isogai
- 05-C Study of the cationic starch adsorption on pulp fiber using ToF-SIMS**
*Yasuyuki Matsusita, Takuya Sekiguchi, Ayumi Suzuki, Kaori Saito, Takanori Imai,
Toshiyuki Kato and Kazuhiko Fukushima*
- 06-C Discriminating between sapwood and heartwood in ancient wood of hinoki cypress by ToF-SIMS**
Kaori Saito, Takumi Mitsutani, Takanori Imai, Yasuyuki Matsusita and Kazuhiko Fukushima
- 07-A Alkali pre-treatment for the bioethanol fuel production from woody biomasses
- Cooking conditions as an alkali pre-treatment**
Tsutomu Ikeda, Tomoko Sugimoto, Masanobu Nojiri and Kengo Magara

- 08-A Variety of reaction woods from the view point of lignin chemical structure**
Yuji Matsumoto, Deded Sarip Nawai, Tomoya Yokoyama
- 09-A Significant lability of guaiacylglycerol- β -phenacyl ether under alkaline conditions**
Tomoya Yokoyama, Aiko Imai, Yuji Matsumoto and Gyosuke Meshitsuka
- 10-A Development of acid soils-tolerant *Eucalyptus* varieties with enhanced citrate excretion**
Tomonori Kihara and Tetsu Kawazu
- 11-B Study of applying the soil leachate and content investigation to combustion ashes**
Kazuya Ikeshima, Kenji Kimura, Kaori Inoue and Makoto Iwasaki
- 12-A The influence of the base paper's sizing degree on PVA surface sizing**
Takashi Okuda, Yasushi Ozaki and Akira Isogai
- 13-A A new detection method of the fluorescent whitening agents contained in the paper packing container for foodstuffs**
Takayuki Jikibara, Chen Ying Tang, Eishun Tozaki and Takashi Miyagawa
- 14-B New on-line fiber orientation sensor system based on anisotropy of dielectric constant; its development and proof experiments (III)**
Masahiro Kurosawa, Hidetada Sawamoto, Ikuko Furukawa, Shinichi Nagata, Shinobu Takahashi, Noriaki Kurogi and Katsuhisa Izuka
- S-01 Why the arid land afforestation? - CO₂, biomass or materials?**
Toshinori Kojima
- 15-A Biodegradability of polycaprolactone derivatives with a sucrose based structure**
Mikio Shimada, Suzuka Yamashita, Toru Onishi and Hyoe Hatakeyama
- 16-A Thermal and mechanical properties of lignin-and molasses-based polyurethane foams**
Hyoe Hatakeyama, Ryosuke Kosugi, Mikio Shimada, Shigeo Hirose and Tatsuko Hatakeyama
- 17-A Synthesis and thermal properties of epoxy resins with unsaturated ester chains from ligninsulfonate**
Shigeo Hirose, Tatsuko Hatakeyama and Hyoe Hatakeyama
- 18-A Nano-fiber prepared from parenchyma cell of sugar cane**
Hiroshi Ougiya, Shunji Ohmori, Tatsuya Sato, Atsushi Ohno and Yoshinori Yazawa
- 19-A The evaluation of the recycling ability of carbonized PS zeolite (CPSZ)
- Application to waste water purified treatment**
Takao Ando, Takabumi Sakamoto, Kimio Hiyoshi, Naoto Matsue and Teruo Henmi
- 20-A Computational fluid dynamics analysis of methanol steam reforming behavior using paper-structured catalyst**
Shuji Fukahori, Hirotaka Koga, Takuya Kitaoka, Hiroyuki Wariishi and Mitsuyoshi Nakamura
- 21-A Characteristic of bamboo for kraft cooking and totally chlorine-free bleaching
—Comparison with kenaf, Japanese softwood and fast-hardwood—**
Guangfan Jin, Shiho Takahashi, Akiko Nakagawa and Hiroshi Ohi

- 22-A Development of new oxidizing agents for enhancing oxygen delignification**
Shoichi Miyawaki and Takeshi Iimori
- 23-A An evaluation of the ECF conversion effect on organochlorine compounds reduction in kraft pulp mills**
Hiro Iwata, Hitoshi Takagi and Miyuki Nakagawa
- 24-A An evaluation of the ECF conversion effect on dioxins reduction in kraft pulp mills**
Reiji Kaneko, Takayuki Jikibara, Kazuto Kawasaki, Kenzo Maezawa, Katsuichi Terada, Kazuhiro Yano, Koji Tanaka, Tadashi Shigemoto and Kazumasa Toyota
- 25-A Preparation of hexenuronosyl-xylooligosaccharides from an enzymatic hydrolysate of kraft pulp xylan for the screening of novel hexenuronic acid-liberating enzymes**
Shinya Gomi, Yuko Aoki, Tomoko Shimokawa, Hiroshi Ohi and Shigeki Yoshida
- 26-A Influence of DIP on Dimensional Stability of Paper**
Hiromichi Tsuji, Shisei Goto and Takeshi Iimori
- 27-A An assessment on the extent of deterioration of naturally aged papers using acoustic emission monitoring**
Takyuki Okayama, Kei-ichi Sato and Rizu Kobayashi
- 28-A The effect of color immobilization on spray coated paper quality**
Akinobu Chatani and Koji Okomori
- 29-A The influence of blanket type on print gloss development**
Masanori Kawashima and Douglas W. Bousfield

POSTER PRESENTATIONS

- P-01 Production of a functional organic material from biomass**
S. Kajita, Y. Katayama, Y. Otsuka, M. Nakamura, S. Ohara, E. Masai, M. Fukuda and K. Shigehara
- P-02 Preparation and thermal properties of carboxymethylcellulose-based polyurethane hydrogels**
Toru Onishi, Hyoe Hatakeyama and Tatsuko Hatakeyama
- P-03 Preparation and mechanical properties of lignin-molasses-based polyurethane composites**
Tadahide Ohsuga, Hyoe Hatakeyama and Tatuko Hatakeyama
- P-04 Chemical composition of high density eucalyptus woods and their response to kraft cooking**
Mitsuko Homma, Akiko Nakagawa, Chiaki Tadokoro, and Hiroshi Ohi
- P-05 Degradation behavior of recycled copy paper by accelerated light aging**
Daisuke Nagata, Daisuke Kobayashi, Takayuki Okayama and Tsukasa Masuda
- P-06 On the factors concerning wet-strength development of paper prepared with chitosan**
Takao Obokata and Akira Isogai

- P-07 Surface analysis of papers treated with corona discharge**
Kazuko Sugimoto and Yasushi Ozaki
- P-08 The analysis of ingredients in paper coatings by the micro-ATR imaging technique**
- The component analysis of the coating layer inside the multi-layer medium –
Koichi Yasui, Masayuki Omatsu and Makio Kishimoto
- P-09 Evaluation of water-absorptivity and water-repellency of paper by micro-sizing degree**
Toshiharu Enomae, Yohta Mori and Akira Isogai
- P-10 Determination of hydrogen peroxide by high performance liquid chromatography**
Kengo Magara, Tsutomu Ikeda, Tomoko Sugimoto and Shuji Hosoya
- P-11 Paper-structured catalysis with porous fiber network for hydrogen production**
Hiroataka Koga, Shuji Fukahori, Takuya Kitaoka, Hiroyuki Wariishi and Mitsuyoshi Nakamura
- P-12 Catalytic NO_x reduction using paper-structured catalysis for combustion exhaust gas purification**
Hirotake Ishihara, Hiroataka Koga, Shuji Fukahori, Takuya Kitaoka, Hiroyuki Wariishi, Akihiko Tomoda and Ryo Suzuki
